

## Aka-Lube Lubricants

Our lubricants have an unmatched combination of removal rate and surface finish. We utilize a 2 phase system, with particle size in nano range. This allows for the lubricant to get in between the diamond and the sample, where the actual cutting is taking place.

- Full range of water-based lubricants
- Superior to alcohol-based types by up to 50% in material removal
- Little effect of overdosing
- Biodegradable

### Aka – Lube Clear +

**Aka-Lube Clear+** with the thinnest lubricating film, used where material removal is most important.

Product No	Product Name	Content	Weight Kg	Price
AK3800	Aka – Lube Clear +	1l	1.10	£18.95
AK3810	Aka – Lube Clear +	5l	5.10	£68.95

### Aka – Lube Green

**Aka-Lube Green** with a thin lubricating film, used where material removal in combination with finish is most important.

Product No	Product Name	Content	Weight Kg	Price
AK3600	Aka – Lube Green	1l	1.10	£15.95
AK3610	Aka – Lube Green	5l	5.10	£58.95

### Aka – Lube Red

**Aka-Lube Red** has the thickest film and is used for final polishing where the finish is more important.

Product No	Product Name	Content	Weight Kg	Price
AK3400	Aka – Lube Red	1l	1.10	£15.95
AK3410	Aka – Lube Red	5l	5.10	£58.95

### Aka – Lube Yellow

**Aka-Lube Yellow** ranges between the two and is used where Lubricant Green is too aggressive, or as a general Lubricant.

Product No	Product Name	Content	Weight Kg	Price
AK3700	Aka – Lube Yellow	1l	1.10	£15.95
AK3710	Aka – Lube Yellow	5l	5.10	£58.95
